

SEE WHAT CUSTOMERS ARE SAYING

"The QSS Laboratory Information System has so enhanced our ability to provide 'value-added' services to our clients that I consider it our 'secret weapon'. The system is so user-friendly and so easily customized that it has truly given us a competitive edge over many of our direct competitors. We consider QSS a working partner with our laboratory: their considerable expertise has greatly improved both our laboratory and our billing functions. It is a pleasure to work with a company with such dedication to good, old-fashioned service."

-Ginny Morris

Partner - Graham Massey Analytical Laboratories

"The QSS team has consistently provided the highest level of support for their laboratory software products. Their LIS has been significantly enhanced to suit our unique segment of the laboratory business, and automated to keep staffing costs from rising. The QSS team always responds quickly and efficiently whenever we need them and has truly been an asset to our company."

-Robert Berkenbush

Billing Manager - Medilabs, Inc.

"The most striking advantage of Quality Software Systems is its staff and the services they provide. The response time is much faster than the industry norm. Often a customized change is completed within hours from request. In the age that electronic solutions can improve operational efficiency, fast response directly translates to profitability.

"The other advantage of QSS is its expertise and experience and its staff's unique understanding of clinical laboratory operations. The QSS staff serves the function of an 'IT business liaison manager' to help find the most efficient IT solutions for the difficult issues that our operation team faces."

-Philip Chen, MD, Ph.D
